

Help Improve Adult Vaccination Rates

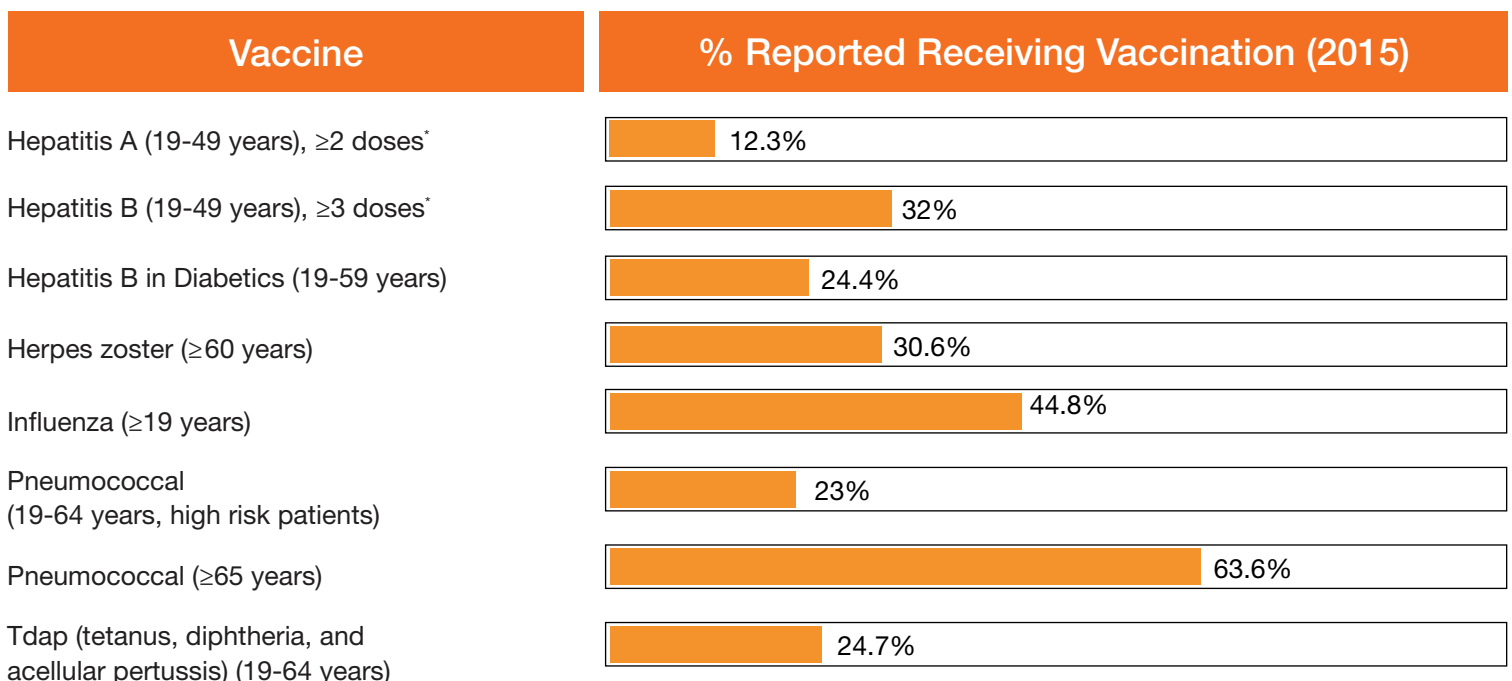

You Can Make a Difference

Every year thousands of adults in the US become seriously ill and are hospitalized because of diseases that vaccines can help prevent.¹ Help make a difference and let your adult patients know that vaccination is an important preventive care measure that can be performed in the pharmacy.²

Be a Part of Improving Adult Vaccination Rates

Despite longstanding recommendations for use of many vaccines, vaccination coverage levels among US adults are not optimal.³ By engaging with your patients and helping them to understand which vaccines are recommended for them, you can help to improve adult vaccination rates in your community.³

Vaccination Coverage Among Adults in the United States³

*For these vaccines, the Centers for Disease Control and Prevention recommendation is based on risk group membership rather than age.
