

Dear [Customer],

Are you wondering if you should get the Tdap vaccine? [Retailer] is here to help!

If you are pregnant, have never received the Tdap vaccine, or have close contact with a baby and have never received the Tdap vaccine — Tdap may be right for you.

For protection after a wound, speak to your doctor about your specific vaccination needs based on the time since your last Td vaccination and the specific wound you have.

Tdap helps protect you against the following:

- Pertussis (Whooping Cough)
- Tetanus
- Diphtheria

Come to [retailer address] for a vaccination, right in our pharmacy.

Questions? Visit the pharmacy and talk to a pharmacist to learn if the Tdap vaccine is right for you!
